

A NEW SPIRIT OF OPTIMISM FOR ARMS PARLEY

Washington.—A new spirit of optimism for success at the arms and economic conferences at Geneva and London was noted privately by American officials as they analyzed reactions to the numerous declarations of President Roosevelt and Chancellor Hitler, of Germany and laid plans for their next moves.

From eight more nations, including Germany and Italy, the United States president received replies to his appeal for disarmament and peace. They brought to 20 the number of sovereigns and presidents who have replied to the cablegram addressed to the rulers of 54 countries.

King George graciously acknowledged receipt of the message, adding that he had communicated it to governments of the British empire's component parts.

President Paul von Hindenburg's message was noted in Berlin, because of the key position occupied by his country, with France, in the Geneva arms discussion.

This declaration, in which you show the world the way to eliminate the international crisis, has met with hearty approval throughout Germany," Hindenburg's acknowledgment said.

In a note understood to convey the views of Premier Mussolini, the Italian government said it was ready to join United States and other countries in negotiating about the arms and president's plan, "in the most expeditious and efficient way."

The next move by United States in the arms situation is expected to be made at Geneva.

Pay Homage To Loyalists

Premier Bennett Visits New Brunswick For Celebration

Saint John, N.B.—Canada's prime minister came to his native New Brunswick and joined the city of Saint John in paying homage to the United Empire Loyalists who landed on these shores 150 years ago. The sequel-centennial celebration marked a day of intense activity for Rt. Hon. R. B. Bennett from the time of his arrival in the morning until he embarked for Ottawa at night.

It was a public holiday in New Brunswick, but observance on a large scale was confined to Saint John, where the first great number of Loyalists from New York landed May 19, 1783. The prime minister, a Loyalist descendant and honorary president of the New Brunswick Loyalist Society, received the freedom of the city, reviewed military and naval units on parade, and was the principal speaker at an indoor public meeting.

Says No Election

Premier Henry Says No Appeal To Ontario Electors In June

Toronto, Ont.—Briefer communication was made by Premier George H. Henry that the Ontario Government would not appeal to the electors in June of this year. "No, we are not going next month," was the Henry declaration.

Notwithstanding the Henry statement, the newspaper says there is every indication around parliament buildings, however, that the wheels of preparation for an election are beginning to gather speed.

Threw a Bomb

Attempt Is Made To Assassinate Chinese Envoy

Tientsin, China.—An attempt was made to assassinate Hwang Fu, representative of the National Government at Nanking, by a Chinese who threw a bomb as Hwang arrived at the railroad station.

Hwang reported to be slated as minister to north China from the Nanking government, was unharmed, but his assailant was slightly injured by the blast.

The Chinese said he was a political enemy of Hwang.

Limit On Appointments

Ottawa, Ont.—Appointment made by the radio commission will continue only until March 31, 1934, according to an amendment which Prime Minister R. B. Bennett suggested to the government radio bill. They may be renewed when that date is reached.

South Africa faces a wheat shortage.

W. N. U. 1933

Plans World Flight

Wiley Post Will Make Solo Attempt To Circle Globe

Ottawa, Ont.—Wiley Post, co-leader of the round-the-world flight record, announced that he would take off about July 1 in a solo attempt to lower the mark.

The flight, Post said, will be made in the "Vinnie Mae," in which he and Harold Gatty flew around the globe in eight days, 15 hours and 51 minutes in June, 1931. The plane will carry a new motor.

"I am simply going out to set a new record, my personal ambition," was Post's only comment. "I will have no backer, no manager and no number."

Instead of a human companion, Post will be aided by a robot which he has been testing for several weeks. Post expects the robot to relieve him of most of the work of flying, leaving him free to navigate and rest.

Under plans announced, the route would be much the same as that followed by Post and Gatty Post would leave from New York with the intention of making a direct non-stop 33,000-mile flight to Berlin. He then would make a 4,300-mile jump over Russia, which probably would be broken at 2,600 miles for re-fueling.

From Russia he plans to fly 2,200 miles over water and ice to Fairbanks, Alaska, and then 1,450 miles to Edmonton and 2,100 miles back to New York.

The rebuilt plane will have a cruising speed of about 170 miles an hour and top speed of 225 miles an hour.

Ban On Titles

Claim Rule Is Not Binding On His Majesty's Government In Canada

Ottawa, Ont.—It is the considered view of the government that the 1919 motion which to honor a majority vote of the members of the House of Commons of the 12th parliament, is not binding upon his majesty, or his majesty's government in Canada, or the 17th parliament, Premier R. B. Bennett told the House of Commons.

The promotion of Sir George Percy in the Order of St. Michael and St. George, the premier said, was in accordance with established constitutional practice.

Among parliamentarians the general interpretation of the government's reply is that Canadians are not precluded from receiving titles in the New Year honor list, the king's birthday or similar occasions.

The answer was in reply to a question by Joseph Mercier (Lib., Laurier-Outremont). Mr. Mercier asked: "Do the decorations granted in the Order of St. Michael and St. George and in the Order of St. Gregory the Great, mean that Canadian holding titles in any order may now accept promotions in the same order as such promotions do not carry any rank or title?"

Will Not Resign

Premier Bennett Says Government Will Not Resign Over Senate Defeat

Ottawa, Ont.—The government will not resign because of the defeat in the senate of the bill to amend the "Judges' act," Prime Minister R. B. Bennett said in answer to R. W. Jacobs (Lib., Carleton), in the House. Mr. Jacobs harked back to the statement in the House some days ago by Mr. Bennett in respect to the railway bill, when he said that if the government dismissed any of the proposed Canadian National railway directors and the senate refused to cooperate in a joint address to make the dismissals statutory, he would resign. He asked if the action of the senate would have the same effect.

"I have no such intention," he prime minister replied, "nor did I ever intend it should be so, except in the case of a joint resolution."

Get Jail Term

Denton, Iowa.—Twelve men arrested at a farm sale here April 26, pleaded guilty in district court recently, to charges of contempt of court and resisting services of a court process. Judge Homer C. Fuller sentenced each defendant to one year in state penitentiary on the resistance charge, but issued bench paroles.

Duties On Strawberries

Ottawa, Ont.—Two cents per pound will be added to the value for duty of strawberries imported into Canada from May 25 to July 31, inclusive, when entered under the intermediate or general tariff. It was announced by the department of national revenue.

Former Inspector Sentenced

Crime Career Of C.N. Employee In England Is Revealed

London, Eng.—An astonishing career was revealed at Old Bailey, when Arthur Hay, aged 45, former inspector of the Canadian National Railways was sentenced to three years penal servitude when found guilty of thefts of suitcases from railway trains in all parts of the country, containing property valued at nearly \$15,000.

It was stated Hay was followed 2,000 miles by a railway detective. Among villages Hay was stated to have been convicted of stealing in 1908, in England, after which he went to South America and worked on a rubber plantation. He joined the Royal Northwest Mounted Police and later served in the Dardanelles during the war.

In 1927 he went to Australia, where he was sentenced to jail for theft in Melbourne, Sydney and Brisbane. He was also sentenced to 18 months' imprisonment in Manchester in 1931 for stealing \$10,000 worth of jewelry.

ACREAGE CUT TO SOLVE THE WHEAT PROBLEM

Geneva, Switzerland.—The wheat conference held here during the week attended by delegates from Canada, Australia, United States and the Argentine, has adjourned.

It is believed representatives of the four great wheat exporting countries agreed to the principle of a 10 per cent. reduction of acreage and regulation of exports. The official communiqué issued, however, merely states the committee hopes to formulate definite proposals after its second meeting in London a few days before the world economic conference.

MENTIONED FOR BOARD

Practically To Make Joint Representations

Winnipeg, Man.—That the three prairie provinces present a combined front to the Dominion government in asking a uniform federal relief policy, is the hope of Premier John Bracken of Manitoba.

Mr. Bracken following a conference between the provincial government and representatives of Manitoba municipalities, which decisions were employed are growing in numbers and that increased aid from Ottawa is essential, declared he would visit the premiers of Alberta and Saskatchewan, suggesting the three provinces make joint representations to the Dominion government.

Reviewing relief work since 1930, Premier Bracken said 90,000 people now are on relief in Manitoba. More than 50,000 of these were in Winnipeg and St. Boniface, the province's two largest cities. Number on relief has increased 40,000 in the past year, he said.

Penny Saving

Economy In Civil Service Could Save Millions

Ottawa, Ont.—The importance of guarding petty expenditures in the civil service was stressed by Watson Selby, comptroller of the treasury, finance department, in the course of an address before the civil service branch of the Canadian League here.

"If each of 20,000 civil servants were to undertake to perform his or her duties every day in such a way that the operating cost per employee was reduced by one cent a working hour, the saving would take care of over \$40,000,000 of debt," he said.

Mr. Selby, comptroller of the treasury, finance department, in the course of an address before the civil service branch of the Canadian League here, said that the operating cost per employee was reduced by one cent a working hour, the saving would take care of over \$40,000,000 of debt.

LOAD OF DEBT BEARS HEAVILY ON DOMINION

Ottawa, Ont.—The public debt of Canada, the nine provinces, municipalities and corporations amounts to \$85,350,706.80, the parliamentary banking commission reported to the House of Commons.

This load of debt represents an annual interest charge of \$121,965,580 at an average rate of 4.47 per cent.

Containing a number of recommendations, chief of which is one that urges a general conversion of Canada's outstanding obligations at lower interest rates, the report also details the debts of the country and those of the provinces and municipalities.

Canada's net debt (dominion) was placed at \$2,699,000,000 with the annual interest of \$121,965,580.

The gross direct liabilities of the provinces totaled \$1,363,382,461, on which annual interest payments amounted to \$62,715,583, while provincial indirect liabilities added a further \$215,977,011, with \$90,671,031 annual interest.

The grand total of direct liabilities of Canadian municipalities was \$1,363,382,461, on which annual interest payments were \$62,715,583, the report stated.

As at March 31, 1933, bonds guaranteed by the Dominion of Canada for both principal and interest amounted to \$700,148,204, while those guaranteed for interest only totaled \$216,600,000.

Railway debts amounted to \$919,600,000, a figure, however, which is far as the Canadian National Railway is concerned, embraces only that portion of its obligations not guaranteed by the Dominion. The debts of other corporations amounted to \$178,000,000.

With regard to private debt, the commission said that the country's overall liability partially covered the field. However, the census of 1931 estimated that out of a total of 654,297 owned and partly owned farms in the Dominion, 244,201 were mort

BANKERS ADVISE ADVERTISING

Merchants who do not advertise are
invited to read the following from the
American Bankers Magazine, as it

might give them a new slant on busi-
ness—your own business—as well as
the matter of building up your town.
“No business man in any town should
allow a newspaper published in his
town to go without his name and busi-
ness being mentioned somewhere in
its columns. This does not mean you
should have a whole half or even a
quarter page ad. In each issue of the
paper, but your name and business
should be mentioned. If you do not
use more than a two-line space, a
space giving you a newspaper
should be able to tell what business is
represented in a town by looking at
the paper. This is the best possible
town advertiser. The man who does
not advertise his business does an in-
justice to himself and the town. The
man who insists on sharing the busi-
ness that comes to town, but refuses
to advertise his own is not a valuable
addition to any town. The life of a
town depends on the live, wide-awake
and liberal advertising business men.”

LEVATHAN, ONCE GERMAN
QUEEN OF SEAS, MAY BE
SCRAPPED BY UNITED STATES

Having occasionally traversed the
ways of the ocean for almost 25 years,
the Levathan, once flagship of the

United States lines, once—as the Va-
terland—German queen of the seas, is
tied up at Hudson dock, waiting ap-
parently for the scrap heap. The United
States shipping board can find no
buyer for the great vessel at any
price.

As the Europa, in 1915 she was
launched at Hamburg, the largest pas-
senger vessel in the world. Then came
the war. The Vaterland was confiscated
by the United States upon entrance
of that country into the war. Her
mighty sides spotted with cannon
fire, the pride of the German mer-
cantile fleet began to carry soldiers
across to fight against her builders.
When the war ended she brought back
the commander-in-chief of the United
States forces, General Pershing.

The Levathan broke the world's re-
cord from Chebourg to New York,
making it in five days, seven hours
and 20 minutes.

REVISING THE BILL

The story is told of a doctor who
sent a bill to a high tempered farmer.
The bill read: “Two visits—\$10.00.”
When the farmer received it he prac-
tically exploded. Blue with rage he
rushed to the doctor's office. You're a
robber, he shouted. Think of it! Five
dollars a visit. It ain't worth it. You
make out the bill like it oughter be
or I won't pay it.

“Very well, I will revise it,” the
doctor calmly replied.

Whereupon he wrote:
“On getting out of warm bed at 2
a.m.; answering telephone; disturbing
wife; dressing hastily in the cold; go-
ing to garage; cranking up Lincol;
driving five miles in zero weather over
a treacherous ice covered road; treat-
ing you for stomache poisoning. MAY-
10-1933. YOUR LIFE; driving home; put-
ting car in garage; awakening wife
again; undressing; getting back into
bed half frozen—five dollars. Second
visit the following week at 1 a.m. to
relieve baby of bad attack of cramp-
pits dollars.”

As he handed the revised bill to the
farmer he said: “I won't make any
change for the second visit if you can't
afford to pay it, and you needn't pay
for the first unless you feel that it
was worth the price.”

The farmer silently read the bill,
and slowly, and shakily a ten dollar
bill out of his wallet and handed it
to the Doctor.

KNOW YOUR MUSHROOMS

It doesn't pay to guess as to the
edible qualities of mushrooms; and
other fungi which grow in abundance
in all parts of Canada from early June
until the heavy frosts of fall destroy
them. H. T. Gussow, the Dominion Bot-
anist, in his very complete book,
“Mushrooms and Toadstools” states:
“Let us state most emphatically that
a knowledge of fungi is the only safe
means of distinguishing edible fungi
from poisonous.” There are essentially
two classes of mushrooms, which are
deadly poisonous, the Fly Amanita
and the Destroying Angel or Death
Cup. The Fly Amanita is distinguished
by a bright yellow or orange colored
spot dotted with white mecks; while
the Destroying Angel is characterized
by a deadly pale green. Both of these
classes have three clear danger signals
which anyone can readily recognize.
The first is a permanent white gill;
the second is a collar at the top of the
stem; and the third is the serrated
rim or cup at the base.

Snicklefritz

Young Husband: “It seems to me my
dear, that these pancakes are rather
heavy.”

His bride: “Then I'm afraid you're
a poor judge for the cookbook says
they are light and feathery.”

Father: “So you'd like to marry my
daughter, eh? What do you make?”
Sister: “Nothing, sir. I don't even
know the stuff.”

“Don't you think that women are
less exacting than men?”
“Well, numbers of them certainly do
not seem to want their mounds of flesh.”

Hubby: “You know, I don't like all
this metaphorical stuff. I wonder what
this writer means by ‘mounds of thought’?”
Wife: “Oh, something like that fine
you're always promising to buy me.”

Was Mildred's wedding a swell
affair?

Positively! They ever used puffed
rice.

I wonder whether Dad or Mother
went out about at Christmas.

Huh. The best Dad expected was
a tie.

The night wore on, the post sang
but he omitted too.

Just what the night had on—

Prize 'twas the glow of the day.

My fiver, 'tils of thee.

Short cut to poverty

**LATEST IMPROVED
Coleman Iron**

Model No. 4A

“Smooths
the Way
on
Ironing
Day”

CUT your ironing time one third... banish ironing day troubles!
You can do it with the new Instant-Gas-Iron. You can do better
work, too, do it easier and faster.

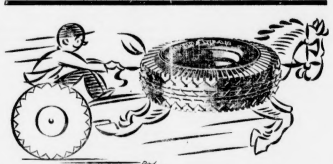

The Coleman lights instantly... no waiting. Has Roto-Type
Generator with cleaning needle which can be operated while burning.
Makes and burns its own gas from regular motor fuel.

Use your Coleman anywhere... in the coolest room, or out
on the porch. Pointed end ends... forward and backward
strokes give the same wrinkle-proof results. The point is always
hot. Tapered soleplate, which makes it easy to iron around buttons,
under pleats and along seams. Beautifully finished in blue porcelain
enamel and gleaming nickel.

Greatest Reindeer Trek In The History Of The Arctic Regions Is Now Nearing An End

Greatest reindeer trek in Arctic history near its end.

Its story is a thrilling saga. Lapp and Eskimo reindeer punchers, armed with clubs and blizzards and starvation and wolves for three and a half years in a merry feat which will mean permanent food supplies for dwindling Eskimo population of the northern rim of Canada.

It now looks as if 3,000 reindeer, a sturdy animal easily domesticated, will be successfully delivered at the government's new reindeer reserve east of the Mackenzie delta early next year.

Back in 1926 the plight of the Canadian Eskimos reached a point where Ottawa decided the northern natives must have permanent food supplies. Eskimo food deficiency. Caribou migration brought them heavy toll. Forlorn brothers, two Arctic biologists, were sent to hunt for very Canadian reindeer ranching prospects. They finally recommended an area 10,000 square miles in size, just east of the Mackenzie's great northern delta. There deer moas abound and many other natural advantages were reported.

Three years later, when investigations were complete, Ottawa contracted with Lomen brothers, Alaskan reindeer pioneers, to deliver 3,000 Alaskan deer. The Lomen firm was offered \$60 each for deer delivered on the Mackenzie reserve.

Within six months a herd of 2,000 healthy animals had been rounded up in the Buckland Valley on the west coast of Alaska, fully 1,800 miles by coast line from the northern Canadian border. The herd started its slow trek east, with native herders and sleds and shepherd dogs following a route fixed by an airplane survey. They thought they could reach Canada in a year and a half. Already three years and a half have passed and it will be another year before the herd is delivered at the reserve.

Skiing reindeer punchers more than once faced death. They took their wives and children with them. One child died. They had 3,000 adult deer when they started.

Wolves, storms and pressing food needs cut 1,000 from the herd. But sturdy skiers reached Canadian territory this spring with 2,000 of the original herd and 300 young deer.

Wolves frequently cut into the big herd, killed off 100 deer in one winter. Wolves would lead the herd, kill six or seven animals, stop to devour what they wanted and come back for more.

Two years ago more than 500 reindeer were lost in a storm. Herders pursued them, ran short of food and were abandoned for a week. Wolves and bits of hard dough scraped from their equipment. It was six months before the lost deer were finally returned to the herd.

Tom Wood, Eskimo camp manager, was lost for three days in a storm. In that country temperatures are often as cold as 70 below zero for days at a time. It is an unappealing uncharted waste, terror of Eskimo and white explorer alike. Wood faced death. He is a man of intelligence who had been to a mission school in Alaska. His strength helped the Eskimo find his way to the herd.

He prayed to God. Today he says that, through the storm, he saw the dim figure of a woman.

He struggled to his feet pressed on, found a white trapper's igloo. The trapper's wife, by chance, had stepped outdoors for a few moments and the Eskimo had seen her. She had not seen Wood.

But the Eskimo had seen the woman and feels it was God who answered his prayer.

Eskimos wore reindeer skins throughout the long winter. It was almost impossible to freeze in such clothing. They were forced to ski rapidly to round up straggling deer. Found themselves perspiring in sub-zero weather. Their double parkas were damp with perspiration for days but the Eskimos and Lapps pulled through.

It was a terrible trip. Two crews of herders were forced to quit. Now near Herschel Island the herd is in charge of Andrew Bahr, veteran Lapp boy, and Tom Wood, Alaskan Eskimo, camp manager. There are three other Lapp herders and three Eskimo, besides families of Eskimos and Lapps. When they arrived there the Eskimos asked only for hymn books.

Patient Almost Bosses Job

New Gadget Makes Him Master Of Dentist's Drill

Painless dentistry—almost—with the patient the boss of the job, is the latest gift of science to man. With the new gadget, the patient with the aching blizzard or rear molar, sits in the dentist's chair holding a remote control switch with which he can stop or start the drilling when he desires.

The dentist now becomes a fixture like a radio or victrola to be turned off when he begins to "get on your nerves." The remote control has this advantage, J. C. Forstner told a group of skeptical practitioners clustered around a working model of the contraption at Atlantic City. "It enables a dentist to render service pleasantly and it enables the nervous patient to keep calm through the knowledge that he can stop the drilling at any time."

"The patient with the confidence inspired by having remote control in his hands screws up on most dentists, but he can stand much more pain than he could without it."

Historic Barracks Removed

Wreckers Rare Building Occupied By Mounties Half Century Ago

Old and rickety, the last building in the group occupied by the Royal North West Mounted Police, at Medicine Hat, back in 1883, has been destroyed by fire.

Fifty years ago it was the officers' mess and stood alone after fire had destroyed the rest of the police barracks which in their day were the property of peaceful settlers against roving bands of Indians and border outlaws. The buildings were constructed by the Galt Coal Co. of lumber brought into the settlement shortly after the Canadian Pacific Railway was built. The Medicine Hat police buildings has taken its departure.

Using Fifty-Foot Craft

Man Who Crossed Pacific In 60 Days

Captain Robert Ward, veteran Pacific Ocean navigator who left Victoria last September for Hong Kong by liner, will essay the return journey in a 50-foot sailing craft, now under construction, according to word received.

The route of Captain Ward's trans-Pacific voyage has not yet been determined. It is believed he will take the same course as when he sailed the 65-foot "Coquett" to Victoria from the Orient two years ago. At that time he took a southerly course to Honolulu, calling at a number of South Sea Islands.

Captain Ward is famed for his feat of sailing a Chinese junk across the Pacific to Victoria, thence through the Panama Canal to New York more than 10 years ago.

Might Come Cheaper

"Your teeth are in bad shape," said the dentist. "You should have a bridge put in at once."

"How much will a bridge cost?"

"About seventy-five dollars."

"Say, doctor, can't I get along with a small culvert?"

More Ships From Churchill

Volume Of Traffic Expected To Exceed That Of Last Year

At least twice as many ships as last year will load at the port of Churchill during the present season, according to information received by the Saskatchewan traffic council at a meeting held in Saskatoon.

Last season 10 boats visited the port. It was announced that the Dalgleish Steamship Company had now arranged for the first boat, the S.S. Pennyworth, to load at Glasgow July 17, Newcastle on-Tyne July 25, and at Antwerp July 28. The company expressed willingness to open the season one month earlier than last year if the underwriters were willing to extend the open dates for hull and machinery insurance in the same manner as Lloyd's were willing to underwrite import and export cargo.

Regarding ocean freight rates to Churchill, announcement was made that the Dalgleish Steamship Company was prepared to accept the same ocean rates for the development of export traffic as now applied to Montreal. This was the same arrangement as was made last year.

The relation of the reduced marine insurance rates recently obtained by the Saskatchewan government, coupled by negotiation with Lloyd's to the development of export traffic in flour, millstuffs, livestock and packing-house and dairy products was considered by the council.

Import tonnage of various commodities during the coming season was considered in detail. The opinion of the meeting was that the total volume of import traffic would considerably exceed the 1932 tonnage.

George H. Smith, traffic representative of the Hudson Bay Route, who acted as secretary of the meeting also reported that arrangements were being completed to take care of anticipated large movement of livestock through Churchill to Bismarck and Cardiff markets.

New Light On Evolution

Discover Brain Of Gorilla Of Very High Type

Discovery in a gorilla of a brain of higher type than ever before found in an animal—nearer the human brain weight than any similar ape's brain on record—was announced by the Smithsonian Institution.

It sheds new light on the evolution of the animal brain upward toward the human level, though giving no direct evidence of relationship of men and monkeys. The brain belonged to a little three-year-old baby gorilla, that died several months ago at the Washington zoo. It was studied by Dr. C. J. Connolly, of Catholic University of America.

Canadians Are Healthy

Record Health Year In Canada In 1932

The year 1932 was a record health year in Canada, in the face of increasingly unfavorable business conditions. This is indicated by the very low death rate, which prevailed among nearly 1,250,000 Canadians insured in the industrial department of the Metropolitan Life Insurance Company. This large cross-section of the Canadian population gives a true health picture of the population in general, it was said. The death rate of these insured Canadians last year was 7.7 per 1,000, a decline of 4.3 per cent. from the previous minimum recorded in 1931.

Aeroplanes Will Be Used In A New War To Be Waged In Effort To Exterminate Locusts

Old Practice Becomes New

Need Of Hard Grit In Poultry Rations Again Stressed

Some times old practices become new again. That can be said of the use of insoluble grit in the poultry rations. For a time there was a swing away from the use of insoluble grit, authorities claiming that because it did not dissolve in the crop, gizzard or intestine of the chicken it had no value and should be omitted from the ration. Only soluble stones that furnished iron or other minerals were recommended.

Now it has become evident that chickens must have a hard grit if they are to do well. That does not mean that minerals are not needed in the ration, but it does mean that a hard grit must also be provided. This is especially true with chickens raised in confinement where they cannot possibly pick up stones and rock fragments from the soil of the range.

The insoluble grit acts as teeth for the chickens in the gizzard. It helps to grind up food and therefore has a tendency to prevent crop bound conditions. The presence of the grit makes the gizzard hard and muscular insuring healthy action of the entire system.

Strange Coincidence

Whom Lander Gets Name Car Ties On Different Occasions

K. H. Johnson, Alberta wheat pilot agent at Conrich, is wondering when the time will come to happen again. On August 23, 1932, Johnson loaded a railway car, No. 504457, with No. 2 wheat for Vancouver. On September 27, 1932, he was loaded No. 2 wheat again for Vancouver when he noticed it was car No. 504457.

"Coincidence," it might have been, but now Johnson is talking about his "double." He loaded car No. 504458 with No. 2 wheat for Vancouver January 9. And a few days ago car No. 504485 came back again to be loaded with No. 2 wheat for Vancouver.

Olds added the same car returning to the same shipping point to be loaded with the same wheat for same destination in the same crop year as in the thirties.

Amateur Broadcasting

Simplified Method Of Sending Messages Developed In France

An automatic radio, immensely simplifying the process of sending messages, has been developed in France. The apparatus can be operated by anyone knowing how to read, operating the necessity of a trained wireless operator. It works by means of knobs, which are turned like the knobs on a radio receiving set. The letters of the alphabet and various signals are printed on a dial turned by a knob, messages thus being spelled out.

The rat population of the world is estimated at 10,000,000,000 as compared to some 2,000,000,000 human beings.

The principle will not grow where the frost bites.

Russia estimates that its present population is 137,000,000.

SOVIET TRADE DELEGATION LEAVES ENGLAND

Two hours after the British engineers from Russia reached England the Russian Trade Delegation in London, left for Moscow without being able to arrange a new trade pact with the British Government. The group above shows the Soviet Ambassador to England, M. M. Mityayev, on the extreme left, while the head of the delegation, M. Ozerov, is shown holding a bouquet of flowers.

In a fresh war which science is waging against locusts, the insect pests which cause such widespread destruction, the speed of air transport is now playing a valuable part. Experts at the British war office chemical department on Salisbury Plain are studying methods by which locust swarms may be exterminated while on the wing, and it was in connection with these experiments, just lately, that it was desired to obtain as quickly as possible a considerable number of live locusts.

To meet this demand the government of Kenya shipped several crates of insects to London by Imperial Airways. Only seven days after having been put on board an airplane at Nairobi the locusts were landed at the London airport, and were sent immediately to the research laboratories on Salisbury Plain.

Here it was found that, though a certain number had died on the journey, there were sufficient left alive to provide material for a number of important tests, during some of which the insects were placed in wind tunnels and subjected to a spraying treatment with cresolite and also with sodium arsenite dust.

The idea of the present experiments is to improve methods for dealing with the locust plague in Africa, and more particularly to evolve methods whereby locusts may be exterminated when they are on the wing and destroy them by releasing clouds of chemicals which are found to be most deadly in their effect. African authorities are collaborating actively in this campaign, which is a matter of the greatest importance, seeing that during the past few years locusts had amounted to more than 10,000,000.

Result Of Old Feud

Embilished Forest Dwellers In England Blamed For Fires

It is said that the constantly recurring fires in Ashdown Forest are the result of the feud between the time of Henry the Eighth, who gave the peasant grazing and other forest rights for tending the deer he hunted.

The feud is being waged, according to the many people who have been spoken to, by embittered forest dwellers.

These men feel that the forest is their heritage, and that property owners are gradually taking it away from them. They are fighting for it with fire.

They have hit fire in Ashdown Forest for many years, but recent abnormally dry weather has given the unruly forest great opportunities for destruction.

Nearly 2,000 acres belonging to wealthy people have been set against the past few years in Ashdown Forest covers approximately 7,500 acres.

A reporter discussed the motives for each fire, and discovered specific reasons in each case.

One of the Ashdown Forest conservators who spoke of the feud declared:

"In the olden days many rangers held the forest and spent their lives driving fire on the forest. The same spirit seems to live on."

"These fires are being lit through sheer 'carelessness.' The board of conservation represents the parliament of Ashdown Forest and administrators law and order. It is therefore the natural enemy of the men of the forest, and is hated."

Butler Conference Suggested

Suggestion that a conference between Canadian and New Zealand representatives of affected interests be held in New Zealand in an attempt to iron out difficulties concerning the importing of butter from the southern dominions into Canada, was made in a resolution adopted by the annual meeting of the British Columbia division of the Canadian Manufacturers' Association in Vancouver.

Insquiry From Jamaica

A letter was received recently by the Regina Board of Trade from Kingston, Jamaica, asking that any Saskatchewan factories could quote prices on orange crates knocked down from trees. "If they make egg boxes they can surely make orange crates," says the letter.

Vegetables are being dried by a new process in Sweden to preserve essential vitamin contents.

WORLD HAPPENINGS
BRIEFLY TOLD

Orange juice produced in the British West Indies and imported direct to be admitted into Canada free of duty.

Recognition by parliament of the services of Captain J. E. Bernier, veteran Arctic explorer, was suggested in the senate by Hon. J. P. H. Casgrain, of Montreal.

All German ships have received orders to fly the swastika flag of the Nazis, and the first vessel to do so in Vancouver harbor was "Ms. Oakland."

The immigrant resident population in Canada at the date of the census of June 1, 1921, numbered 2,207,535, of which more than 51.15 per cent was found west of the Great Lakes.

The United States air mail service was 15 years old May 15. The government observed the anniversary by putting to use a fleet of new trimotored "three-mile-a-minute" planes on its coast-to-coast service.

An 80-foot tunnel pole, one of the finest of its kind, has been presented to the Quebec zoological gardens at Charlebourg by the Zoological Society. It comes from the Nass Valley of British Columbia.

Robert Avery Chipman, Winnipeg, now doing post-graduate work in engineering at McGill University, has been awarded the McGill Delta Phi Memorial scholarship. The scholarship is worth \$900.

With a view to encouraging commercial farming on a large scale in Manitoba, an area of 32,000 acres between the Pas and Lake Winnipeg will be leased under terms "favorable" from the point of view of the prospective farmer.

Commercial shipping between France and Canada, and the travel of business agents between the two countries, will be facilitated by a convention signed recently, as a companion pact to the Canada-France trade agreement.

Proof that a goodly number of art patrons are still able to pay substantial prices for coveted works is provided in the Royal Academy sales to date. One hundred and forty exhibits brought a total of 54,520 this year as against 44,720 to the same date last year.

C.P.R. Chief Praises Roosevelt

E. W. Beatty, President of the C.P.R., Looks For Early Uplift of Trade

E. W. Beatty, president and chairman of the Canadian Pacific Railway, has praised the "courageous and vigorous actions" of President Roosevelt and of the congress of the United States as well as in the direct conversation between the president and Premier R. B. Bennett.

In an article contributed to the "Boston Transcript," Mr. Beatty has analyzed Canada's railway problem, expressed hope in the forthcoming economic conference, and said he looked for an early lifting of the volume of trade between Canada and the United States. Mr. Beatty wrote:

"I have no doubt that the economic situation will steadily, if slowly, improve and that a more or less free interchange of commodities between various areas will commence to make itself felt over the next few months."

It is reasonable to suppose, also, that it will not be long before we see the start of an upturn in the volume of trade between Canada and the United States.

"I am one of those who look hopefully towards the world economic conference, having something more than a small faith in the common sense of the men who are in charge of the struggles of the great nations towards economic salvation, and I am thus assured that our serious economic difficulties will soon be observed to take on a less formidable aspect, the troubles of our railways will be accordingly lightened, but we shall then be faced with the still hardly less though provocative matter of competition in transportation. Railway executives have already directed much consideration and effort in this direction, and results have been without considerable encouragement."

For Auction Failed

Jewish retaliation to Germany's anti-Semitic movement took a formidable form when the long-remembered Leipzig for auction proved a complete failure as a result of an international boycott arranged by Jewish buyers.

Alfalfa is able to live for thirty years or more under favorable conditions.

W. N. U. 1996

Radios in Great Demand

Next To Floor They Constitute Big Selling Shipments To Arctic

Radios constitute the biggest shipment of goods next to flour only, sent into the arctic and traders now buying their stocks in Winnipeg to go north are purchasing all the battery radios, new and used, they can get their hands on.

"The northland," said Col. J. M. Cornwall in an interview at Winnipeg, "is going radio-mad. Every last Indian in the bush country and every Eskimo in the barren lands wants a radio. They will pay any price for them and some of the traders, I fear, are profiteering."

"I know one trader who sold a radio for six white fox skins. These fox skins are worth their weight in gold and then some. But so is the radio and, of course, there is a lot of work about carrying the instruments and the heavy duty cells across the portages east and west of the Mackenzie River."

But the radio, Col. Cornwall explained, is transforming the northland. No longer do the inhabitants sit in silence through the months of winter arctic night. Instead they tune in and the reception is as clear as a bell. No clanking trolley can interfere from the telephone next door.

Col. J. M. Cornwall is a pioneer of the north. His picturesque name, "Voice River Jim," was given him when the Pecos was weeks' travel from the rim of civilization at El Estacion. He was the first modern white man to realize the possibilities of the country.

Prominent Westerner Dies

Herbert J. Hardie Was Well and Favorably Known To Western Canada Printing Industry

The best known personality to visit from time to time the publishing houses of western Canada, from the Great Lakes to Victoria, B.C., Herbert J. Hardie, known as "Herb" to his many associates, died suddenly Saturday afternoon, May 6th, age 63 years. Death occurred at the family residence, 909 Grosvenor Avenue, Winnipeg.

Mr. Hardie had been confined to his home for a few days with a heart attack. He had never been sick a day in his entire life and the ailment was not considered serious. He had been to the room of a daughter who has been ill for some time, and carried it tray to her with her evening meal. Setting the tray down on the table, his own room Mr. Hardie laid down on the bed and died in two minutes. Mrs. Hardie made the tragic discovery.

Mr. Hardie was born in Caledonia, Ont., but when quite young located with his parents at the settlement at Tillsonburg, Ont. There he received his education in the public and high schools.

On Christmas Day, he was married, the bride being Miss Nellie Becker, of Tillsonburg, Ont. Mr. Hardie had secured a position in the Free Press as accountant in the business office. He remained with the newspaper for some time, but was later transferred to the staff of the Toronto Free Press.

Mr. Hardie was a member of the Winnipeg Free Press. He was a member of the Winnipeg Free Press. He was a member of the Winnipeg Free Press.

PUBLISHER PASSES

Herbert J. Hardie

Manager of Toronto Type Foundry Co. Western Branches, whose death occurred in Winnipeg.

Surviving are a widow and five daughters, Misses Irene, Lucille and Jean, living at home; Mrs. Jackson L. Briggs, Toronto; and Mrs. Charles Stord, Winnipeg. Three brothers and one sister are also living: Dr. Elgin L. Hardie, Toronto; Dr. R. A. Hardie, United Church medical missionary at Seoul, Korea; W. A. Hardie, Vancouver, B.C.; and Eva H. Hardie, missionary of the United Church at Moraband, India. Mr. Hardie had been a resident of Winnipeg for the past 41 years.

George H. Sauls, secretary of the Graphic Arts Association, of this city, said today: "Mr. Hardie could be regarded as one of the most successful of the young men who had come from Ontario to the West and made good. He had a wide acquaintance with the publishing business from Port Arthur, Ont., to Vancouver Island. There was not a printing or publishing office in that wide stretch of country which did not know Mr. Hardie personally and on which he had not made from year to year a business and social call."

SUNDAY SCHOOL LESSON

MAY 28

JESUS AND HIS FRIENDS

Golden Text: "Ye are My friends, if ye do the things which I command you."—John 15:14.

Lesson: Mark 13:1-14:9. Devotional Reading John 15:1-17.

Explanations and Comments

Plotting Of Priests and Scribes, 14:1-2.—Two days before the Passover Feast, which is called also the Feast of Unleavened Bread, because for the seven days during which it lasted (leavened bread was eaten), the chief priests and scribes met and discussed how to seize Jesus craftily and kill Him. The deed would have to be done quickly, they decided, before the feast began, for they feared a tumult among the people: if this could not be done, they must be postponed until afterwards, they thought. The proposition which Jesus finally brought them, verse 10, was a one which would avoid the uproar.

The Anointing At Bethany, 14:3-9.—In Bethany, Jesus was the guest of one named Simon still known as "the leper," to distinguish him from other Simons, who he must have been cured of his leprosy or his guests would not have been so friendly and intimate. Similarly Matthew was called Matthew the publican after he had left tax-collecting. To the sister of Martha and Lazarus, who brought with her an alabaster flask filled with very costly ointment, she said, Breaking the flask, which was winnowing, she poured its contents over the head of Jesus. John tells us that Jesus then washed her feet with his hair, and the house was filled with the odor of the ointment.

The disciples, and especially Judas, who was one of the traitors, were indignant at this, saying it was a useless waste. They said that three shillings could have been sold for the poor. The word in the Greek which is translated "shilling" means a coin worth about eight pence half penny, or nearly seventeen cents, the Margin of the Revised Version tells us, and it was the wage for a day's labor. Dr. R. Bruce explains that it was a woman's act, and they were amazed that she was a poet, and they were somewhat prosaic. They spoke harshly to her, saying, "What is this to her? Jesus has anointed her head with ointment, but she has troubled us with her hair?" He replied, "She hath wrought a good work on Me."

They could always help the poor, for the poor would never be lacking, but Himself they would not always have. Jesus reminded them that it was not uttering a prophecy about the poor, it was merely stating a fact that was, and still is, very conspicuous in His hand.

"Our Lord and Master." When He departed, let us in His will. As our best legacy on earth, the poor, let us be sure to leave them. Our hearts would grow as hard as these stones.—Lenteflow.

Funds For Relief Work

Additional \$350,000 For Use By Department of National Defence. An order in council tabled in the House recently, authorizes the expenditure of an additional \$350,000 on the relief work entered into by the department of national defence, and an increase in the number that may be employed to 12,500. The work is to be finished on June 30, according to the plans.

Last fall an order-in-council authorized expenditure of \$750,000 for this purpose, the work to be the laying out of emergency aeroplane landing fields in the more isolated regions across Canada.

Future Of China

Predicts Nation Will Be Split Up Into Two Great Regions

Possibility that China would be split up into two great regions, a monarchist government in the north and the present republican administration in the south, was foreseen by Chiang Keng-shih, chairman of the department of Chinese studies at McGill University.

Deeply moved in their hearts, Professor Chiang believes, northern Chinese desire the return of their abdicated emperor, Puyi, president of Manchuria. He thinks that the Chinese of this section are making use of the Japanese invasion to bring about the dreams of a re-established empire.

Moral Is Obvious

President E. W. Beatty, of the C.P.R., says that only three of the 26,000,000 passengers who traveled by train in Canada in the year 1921 were killed in accidents. In the same year automobile fatalities in Canada numbered 1,314. The moral of this is to travel by train.

Alfalfa has been grown from time immemorial in Persia, and is, perhaps, the oldest forage plant in the world.

Gold mining is now Africa's most active industry.

Ceremony Long Delayed

Dean Reads Burial Service Over

A burial service performed over the grave of Sir Ernest Shackleton, the famous Antarctic explorer, in the lower British South Atlantic island of South Georgia more than 10 years after his death there, is described in a letter received in London recently from the Very Rev. Harold E. Lumsdale, Dean of Stanley, Falkland Islands.

Shackleton died on board the ship, the Endurance, on January 5, 1922, four months after sailing from London on his fourth expedition to the Antarctic.

Mr. Lumsdale took up his present post in February, 1922, and his district includes the South Georgia, South Shetland, South Orkney, and South Sandwich Islands, and any British possession southward to the South Pole. He is now writing the book, "In December I crossed the South Atlantic in a trawler, some 850 miles to minister to South Georgia."

"No priest had travelled there before, and since Shackleton had only been buried by a layman I felt it my duty to say the office for the dead, and added the words of committal."

"On Saturday, December 17, at five o'clock, we set out for the whaler. Large numbers of the gales, Norwegian as well as English, were there."

"The sun was shining brightly on the lofty brown mountains, which were streaked with snow on the sides and were indignant for hundreds of feet for they are 6,000 to 8,000 feet high."

"The little cemetery lies at the foot of these mountains, and we set out for a grave with its stone stands out from the rest."

Among those who attended the service were Commander W. M. Carey, R.N. (retired), of the Royal Reserve ship "Discovery II," which recently returned to Cape Town after cruising for a year in the Antarctic, and many of his officers and crew.

Polar Bear Rugs Fashionable

Many Inquiries Come From East To The Pas

Churchill polar bear rugs are the vogue in the east. Since the Hudson Bay Railway opened, there has been increased interest in white bear rug coverings. Most of the enquiries about the white bears come from the east. Taxidermists, collectors and representatives of museums are seeking specimens of the big bears.

A number of persons have written buyers in The Pas regarding shipments of live bears, especially culms. Recently J. R. Kerr, fur buyer, shipped one bear skin eight feet three inches long and 34 inches wide. It is mounting it for the Brandon, Man. Museum. Another six foot bear was shipped to H. B. Crubiknauk, fur trader, New South Wales. One was sent to John Boland, Providence, R.I.

Hundreds of wild animal rugs have been manufactured in The Pas in the last few months.

Many Students Enrolled

University Attendance Reaches Highest Figure On Record

Enrollment of students in Canadian universities reached the highest figure on record at the end of the academic year, 1932, the Dominion Bureau of Statistics reports. As an explanation the report quotes the Carnegie Foundation for the Advancement of Teaching as saying "persons above high school age are just the group which unemployment throws back into schools in the largest number."

University students in Canada numbered 148,144 students at the end of the year, 1932. This, compared with 40,569 in 1931, was an exceptional increase and the 1931 figure compared with the 1930 enrollment of 31,368 is still more remarkable. In 30 years from 1901 when enrollment was only 9,620, the increase was 320 per cent.

Honey Via Hudson Bay

Basketweaver Exporters Plan Shipments To England Through New Port

Basketweaver exporters are planning to ship honey to Great Britain by a new fast fall via the Hudson Bay route. The British market consumes a large quantity of honey each year, and now that Canadian honey enjoys a substantial preference and it is proposed to guarantee the pound sterling at \$4.60 for export purposes, it is anticipated that it will be possible to realize a better price on the export market than on the home market.

All grain feed for poultry should be ground as finely as possible.

TOWN & COUNTY
Personalographs

High School departmental examinations in Alberta commence this year on Friday, June 16th. Latin is the first exam to be written. We will publish a complete list of examinations and time table in our next edition.

A. W. McKinley of Three Hills was business visitor in town on Monday. Mr. McKinley has given on the green house business and will leave shortly to reside at the Pacific coast.

The Junior group of the L.O.O.B.E. held a special meeting at the home of Mrs. Charles Wilson on Monday night and decided that their annual picnic and excursion to camp on the park this week. Next Wednesday, May 31st, was the day set for the picnic and at 8 a.m. every business man and citizen is invited to turn out on mass to help with the work. They are asked to bring robes, shorts, etc. and to be left to make Carbon's next picnic a memorable. Don't forget. Next Wednesday at 8 o'clock.

Rev. Wm. McNeil left the first of the week to attend conference in Calgary. He will be away over the week-end and his church services will be held at the United Church next Sunday.

It has rained almost every day for six weeks. Showers are still prevalent and we are wondering if the warm-sunny days are at hand.

May 24th passed quietly in Carbon. A number spent the day out of town, while others were afraid of the weather to venture very far from home. The seven miles to the pole line of heavy lumber road was no doubt the reason.

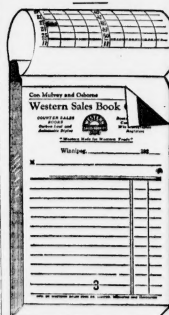

The trees are now all out in leaf and the foliage is a most beautiful to the bald headed prairie. Clothes may make the man, but trees make the country.

The Red Bus Lines announce a new time table this week, effective May 23rd. On that day they commenced the double run daily from Dummeller to Calgary. See the time table on page 1 for further particulars.

Rev. Wm. McNeil left the first of the week to attend conference in Calgary. He will be away over the week-end and his church services will be held at the United Church next Sunday.

NEW STOMACH TREATMENT
GETS QUICK RESULTS

It takes only about 3 minutes for Elmas-Blox, the new, delicious-tasting, natural powder, to bring you relief from stomach troubles. And its pills are lasting. Two thousands are finding a new freedom from the slavery of indigestion and other stomach troubles. Mack's Retail Drug Store has Elmas-Blox. Get a jar from them today!

Record University Year

Registrations of the Alberta University for the term just closed totalled 1955, constituting a new record for the institution, which is this year celebrating its 25th anniversary. In the previous year the total was 1085. Of the total number 1555 were registered for the fall course during the fall and winter terms. Others included the summer session registrations, and those in similar special courses. Distributing facilities, the registrations were as follows: 757 in arts and sciences, 281 in applied sciences, 235 of whom 63 were full-time, in agriculture, 312 in medicine, 47 in the school of pharmacy, 31 in the school of education, 12 in the Bachelor of Divinity course, 181 in the summer session and 125 graduate students.

Miccadoo
Says--

The Lawyer had returned from after an important case in which he had been defending a man charged with murder.

He was acquitted, heamed the lawyer. Wonderful, on what grounds? Instantly, I proved that his father had spent five years in a lunatic asylum. But he hadn't had he? Yes, said the barrister. He was a doctor there, but I saw no need to bring that fact out.

Has (after a narrow escape at the railroad crossing) — Whiffs you know yet now. At that giving do you go good. Too—But at what my horse. 'At was Gabriel's.

Doctor: Now before I examine you, may I ask what you drink?
Jack: Thank you, doctor. A very small soda and—will do, please, thank you kindly, and remember a very small soda.

The bus driver handed back the 56-cent piece to the woman passenger. That coin is no good madam, he told her. It's expired.

Ridiculous, she said, examining the coin. Why to dated 1921. Someone would surely have noticed it before this if it were bad.

Son: I say mother, you remember you said the dentist was painless.
Mother: Well?

Son: He isn't. When I bit his finger he yelled like mad.

A pretty young American girl, enjoying the ocean on the same steamer with Marshall Joffe asked him if he had ever killed an enemy soldier.

Yes, replied the Marshall.
With which hand? She asked.

With my right hand he replied, and immediately she raised his right hand to her line and kissed it.
A British officer standing nearby promptly exclaimed: I've killed two enemy soldiers!

With which hand? The girl asked.
I bit them to death was the unflinching reply.

Let Us Do Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
